PROFESSIONAL SUMMARY

Third-year Integrated M.Tech student specializing in Artificial Intelligence with hands-on experience in multi-agent systems, computer vision, and research automation. Proven ability to build production-ready AI/ML solutions with focus on real-time processing and scalable architectures. Strong problem solver seeking internship opportunities to contribute to innovative AI systems.

TECHNICAL SKILLS

AI/ML & Frameworks: Multi-Agent Systems, LangChain, LangGraph, Computer Vision, YOLOv8, Hugging Face Transformers

Languages & APIs: Python, FastAPI, REST APIs, gRPC, Google Gemini, Tavily API

Data & Processing: OpenCV, Pandas, NumPy, Matplotlib, Seaborn, Vector Search (FAISS, Chroma)

DevOps & Monitoring: Docker, Docker Compose, Prometheus, Grafana, Git, GitHub, eBPF

Tools & Security: SQLite, JWT Authentication, Pytest, TLS, AsyncIO, Python-docx, ReportLab, Linux

EXPERIENCE

AI/ML Engineer Intern

Docu3c

Jul 2025 – Present

Newcastle, Washington

- Building multi-agent orchestration systems using Azure, LangGraph, and FastAPI for optimized response generation.
- Designing agent coordination pipelines for complex task workflows and real-time processing.

Research & Data Entry Volunteer

Real Happiness of Life Foundation

Nov 2023 – Jul 2025

Mumbai, India

- Conducted online research and compiled structured datasets supporting decision-making for social initiatives.

Graphic Design Intern

Sparkling Wings NGO

Feb 2024 – Jul 2025

Mumbai, India

- Designed digital content and campaign visuals for nonprofit outreach and social messaging.

PROJECTS

Multi-Agent AI Orchestration System

LangGraph, gRPC, Prometheus, eBPF, TLS

May 2025

24-hr Internship Challenge

- Designed fault-tolerant multi-agent architecture with secure task pipelines and real-time monitoring.
- Built custom CLI tools leveraging concurrency and AsyncIO to optimize inter-agent communication.

AI-Powered Object Detection for Smart Cities

YOLOv8, OpenCV, Pandas, Matplotlib

Oct 2024 – Dec 2024

University Project

- Developed real-time traffic and pedestrian detection pipeline with RTOS-based edge architecture.
- Created policy-focused visualizations and reports for urban planning applications.

Deep Research AI Agent

LangChain, Tavily API, Gemini, Python-docx

Apr 2025

48-hr Internship Challenge

- Built automated research agent for report generation with multi-agent document analysis and summarization.
- Integrated visualization capabilities using Seaborn and Matplotlib for data-driven insights.

AI Marketing API

FastAPI, Hugging Face, FAISS, Prometheus, Docker

May 2025

- Developed multi-agent system for personalized marketing content with vector search and JWT-secured endpoints.
- Implemented feedback-driven optimization, monitoring with Prometheus + Grafana, and Docker Compose deployment.

EDUCATION

VIT Bhopal University

Integrated M.Tech in Artificial Intelligence

Sehore, India

Sep 2023 – Present
